Projector LCD Panel Video Wall Control Equipment

HEX CONVERTER

The revolutionary HEX Converter, a small gadget with RS232 connectivity on both sides that can eliminate programming issues. In an environment when user wants to change a display device that is controlled via a control panel, re-programming is required. Most end users do not have the programming source code. A programmer will need to be hired to change the programming.
The HEX Converter solves this issue!

HEX CONVERTER

Model: OP-RSC1

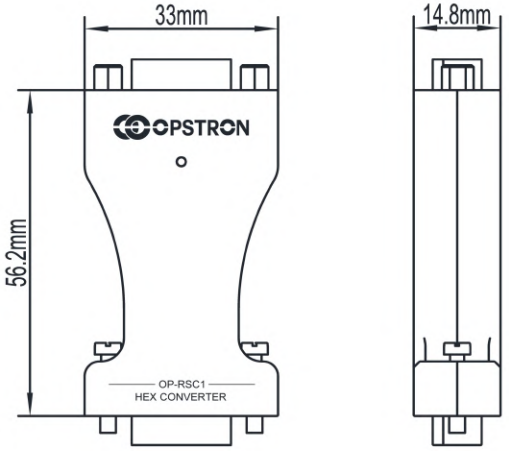

Advantages:

- ❒ **Easy to implement**
  – compatible with all devices using RS232 interface
- ❒ **Flexibility**
  – source code for proprietary control system is not required
- ❒ **Improves productivity**
  – minimum manpower time requiring only basic programming skill
- ❒ **Cost effectiveness**
  – no more hiring of programmer for reprogramming
- ❒ **Seamless import and export serial port commands**
  – complimentary software

Specifications:

- ❒ **Interface characteristics: Compatible with RS-232C EIA/TIA Standard**
- ❒ **Electrical Interface: DB9 gold-plated male connector (9 Pins) and DB9 female connector (9 holes).**
- ❒ **Working Mode: Asynchronous half-duplex transmission**
- ❒ **Transmission Rate: 9600 -115200BPS (Programmable)**
- ❒ **Dimensions: 66.5mm x 33mm x 17mm**
- ❒ **Transmission Distance: >100 meters using 26AWG Twisted pair cables**
